HAND-HELD SHIELD

# ExPll EXP-HHS150

## HAND-HELD SHIELD

The ExPll EXP-HHS150 is a lightweight, hand-held shield designed to provide soldiers with NIJ Level IIIA (0108.01) protection against small caliber handgun ammunition. It is equipped with an ambidextrous handle and shoulder strap that provide comfortable handling and usage, as well as a well-positioned gun port that allows soldiers to conveniently get into a firing position against threats.

The shield also features a high-intensity LED lighting system (600 lumens) that is operated by a 12V detachable battery system. This allows soldiers to have a clear view of their environment in low-light conditions, giving them an advantage in combat situations. The light can be adjusted to different brightness levels, ensuring that soldiers have the right amount of light depending on the situation.

The ExPll EXP-HHS150 is designed to withstand impacts from high-velocity projectiles, as well as being resistant to fire and heat. It is also water-resistant and corrosion-resistant, allowing soldiers to use it in a variety of environments. The shield is lightweight and easy to handle, making it ideal for soldiers who need to move quickly and efficiently in the field.

In summary, the ExPll EXP-HHS150 is a lightweight, hand-held shield designed to provide soldiers with NIJ Level IIIA protection against small caliber handgun ammunition. It features an ambidextrous handle and shoulder strap for comfortable handling, as well as a well-positioned gun port for convenience. Additionally, it has a high-intensity LED lighting system (600 lumens) that is operated by a 12V detachable battery system, allowing soldiers to have a clear view of their environment in low-light conditions. This shield is designed to withstand impacts from high-velocity projectiles, as well as being resistant to fire and heat, making it ideal for use in a variety of situations.

### SMART FUNCTIONALITY

GUN PORT S

### FEATURES

VIEW PORTS

SHIELD LIGHT

WATER RESISTANT

ALL WEATHER PROOF

UV RESISTANT

NON TOXIC

### STANDARD

NIJ 0108.01

### PROTECTION

Level IIIA

### SHAPE

Curved

### DIMENSIONS

950x650(±20) mm

### VIEWPORT

250x100(±5) mm

### WEIGHT

10 Kg Maximum (Inclusive of the lighting system with ballistic viewport and handle)

### COMPATIBLE ACCESSORIES

- 600 lumens led light
- Storage/Carrying bag
- Load bearing system (Optional)
