

A dark blue, semi-transparent background image of a soldier in full tactical gear, including a helmet and vest, holding a large, rectangular hand-held shield. The soldier is in a crouched position, ready for action. The shield is the central focus of the image, and the soldier's hands are visible gripping it. The overall tone is professional and military-oriented.

HAND-HELD SHIELD

The EXPL -HHS 160 Hand -Held Ballistic Shield is an innovative and reliable shield designed to protect soldiers in the field from ballistic threats . With its robust design , the shield is capable of withstanding rough weather conditions and protecting users against NIJ Level III (0108 .01) ballistic threats.

The shield is designed with an ambidextrous handle for comfortable handling and usage. The handle incorporates a strap attachment that allows the user to hold the shield on the shoulders. The shield's flat design also allows for improved mobility and ease of movement.

The shield is equipped with a scratch-resistant ballistic glass view port for enhanced vision and field of view . The view port also features a unique design which reduces the shield 's overall weight, making it more comfortable for the user to carry and maneuver.

The shield also features a protective coating which helps reduce glare and reflections , while also providing additional protection against the elements . Additionally , the shield has a unique design which allows for ventilation, ensuring that the user is comfortable while in use.

The EXPL -HHS 160 Hand -Held Ballistic Shield is an excellent choice for protecting soldiers in dangerous situations . Its robust design and protective coating offer superior protection against ballistic threats, while its lightweight design and enhanced view port allow for improved mobility and field of view. The shield is an essential tool for any soldier who needs maximum protection in the field.
