## PLATE CARRIER

The EXP-PC60Q plate carrier is a revolutionary new design that is revolutionizing the way military personnel protect themselves. It is the first plate carrier to incorporate an advanced Quick Release System which allows a soldier to divest the vest in a single pull action in less than a second. This remarkable design makes the EXP-PC60Q the simplest quick-release ballistic plate carrier on the market, and one that can be recouped and reassembled in less than 30 seconds.

The Quick Release System is a major benefit of the EXP-PC60Q. It employs no cables or wires and is completely ambidextrous, making it easily accessible to both left and right-handed personnel. The system also features an adjustable waistband, as well as shoulder straps that can be adjusted for the perfect fit. In addition, the EXP-PC60Q includes an integrated hydration system and a variety of quick-release buckles and straps for maximum comfort and flexibility.

The EXP-PC60Q is made from lightweight, durable materials that offer superior protection from both ballistic and blunt force trauma. It also includes a variety of features that increase its performance, such as a breathable mesh lining and moisture-wicking fabric. The plate carrier also comes with a variety of pouches and pockets to store equipment and supplies.

The EXP-PC60Q is an ideal choice for those who value their safety and are looking for a quick-release plate carrier. Its innovative design and Quick Release System make it one of the best plate carriers on the market, providing superior protection and flexibility. With its advanced features and quick-release system, the EXP-PC60Q is the perfect choice for any soldier.
