## MAXIMUM PROTECTION

The EXPLL EXP-PCH130T PASGT is a standard helmet designed to provide uniform protection from high velocity ballistic threats. It is a complex and compound shell designed to provide lasting durability and security. The stability harness with standard and comfortable suspension system provides increased comfort and stability for extended use and tactical manoeuvres. The helmet is designed to absorb the impact of a ballistic threat while providing the wearer with maximum protection and comfort. It features a lightweight yet strong construction and is built to be easily donned and removed. The shell is constructed from high performance polycarbonate and composites that provide ballistic protection from the most powerful of threats. The helmet has a unique multi-layer foam padding system that provides excellent comfort for the user. The foam layer is designed to dissipate energy from the impacting force of a ballistic threat while providing comfort and protection against shock. The foam padding is also designed to be breathable and moisture-wicking, keeping the wearer cool and comfortable during extended periods of use. The EXPLL EXP-PCH 130T PASGT also features a four-point chin strap system for secure fitting. The chin strap offers adjustable comfort and security while providing a secure fit when closed. The adjustable system ensures that the helmet is always fitted correctly and securely to the head. The EXPLL EXP-PCH130T PASGT is an excellent choice for those seeking superior protection against ballistic threats. The helmet offers superior protection and comfort while being lightweight and comfortable to wear. The adjustable chin strap ensures a secure fit, providing the wearer with the confidence that their helmet is properly and securely fitted. The multi-layer foam padding system provides excellent protection and comfort, while the construction of the helmet ensures that it is strong and durable enough to provide lasting protection.
